

- World's Most Advanced AI-Powered Ionizer
- 11 Types of Functional Water (pH 2.5 to 11.5)
- Auto & Manual pH Setting Available
- NSF-Certified Filters
- Certified Medical Device
- Energy Efficient Chip (EEC) Technology
- SGS-Certified Platinum-Coated Electrodes
- Patented Dual Auto Reverse Cleaning (DARC) Technology
- Tabletop, Wall Mount, and Under-Sink with a Smart Faucet
- Hydrogen Booster Technology upto 2100 ppb hydrogen & -1000 ORP

MADE IN SOUTH KOREA

Trusted in over 50 countries, including

USA | GERMANY | FRANCE | DUBAI | HONG KONG | AND SINGAPORE

ARE YOU REALLY DRINKING HEALTHY WATER?

The real question is not whether you have access to water, but whether you and your family are drinking truly healthy water

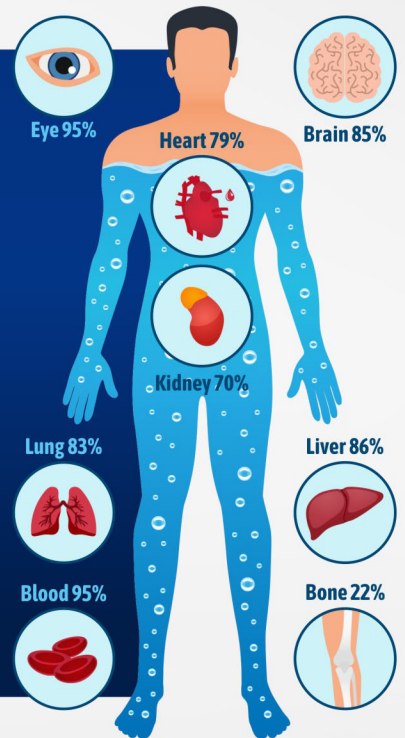

Ask yourself:

Have you tested your drinking water on the essential health parameters?

Here's what Healthy Drinking Water must have:

- 1. Free from Harmful Viruses & Impurities:** No bacteria, viruses, heavy metals, or toxins.
- 2. Correct pH Balance:** Water should be at least pH 7 (neutral to alkaline) to avoid acidity-related health issues.
- 3. Rich in Essential Minerals:** Calcium, Magnesium, Sodium, and Potassium must be present to support bone, heart, and cellular health.

If your drinking water meets all these conditions, you're on the right track. But the reality is – most tap, RO, and bottled water fail these standards.

Why Investing in Better Drinking Water Is the Need of the Hour?

In today's fast-changing world, clean and healthy drinking water is no longer a luxury – it's a necessity. Let us help you understand why:

1. 70% of Our Planet Is Water – Then Why Is There a Water Crisis?

Despite the abundance of water on Earth, only a tiny fraction is suitable for drinking. Pollution, overuse, and mismanagement have made clean water scarce and valuable. This is why water is not just essential – it's becoming expensive.

2. Climate Change = Jal + Vaayu Are Both Polluted

The word climate is deeply connected with Jal (water) and Vaayu (air) – and today, both are under threat. With growing pollution, the quality of our drinking water is deteriorating rapidly. Technology is no longer optional – it's the only solution. Advanced purification and ionization is the future of safe, healthy water.

3. History Proves: We've Always Sought Better Water

From ancient wells to copper pots, from filters to bottled water – mankind has always made efforts to access better water. Now, water ionizers represent the next evolution – intelligent systems that deliver water that supports energy, digestion, skin, and overall wellness.

What Lifecore Ionizer Does for You

With its cutting-edge Korean technology, the Lifecore Ionizer not only ensures all the above essentials but also takes water to the next level of health.

Adds Molecular Hydrogen (H₂) – A clinically proven antioxidant that penetrates deep into your cells.

MADE IN SOUTH KOREA

Health Benefits of Molecular Hydrogen

Powerful Antioxidant:

Neutralizes harmful free radicals linked to aging and chronic diseases.

Boosts Immunity:

Supports the body's natural defense against infections.

Enhances Brain Function:

Reduces oxidative stress on the nervous system, improving focus and memory.

Protects Organs:

Beneficial in conditions like diabetes, kidney strain, liver health, and heart wellness.

Improves Energy & Vitality:

Promotes cellular hydration and oxygenation for higher stamina.

Reduces Inflammation:

Supports joint health and recovery in arthritis and orthopedic conditions.

What is ALKALINE IONIZED WATER?

Contrary to normal water, Alkaline Ionized water is one where our normal water has been Ionized (passed through a chamber of titanium plates coated with platinum) to increase its pH level. This water has higher molecular hydrogen (upto 2100 ppb), upto -1000 mv ORP level, higher pH and smaller water molecules compared to normal water which makes it alkaline, rich in antioxidants, allows it better absorption by our bodies.

1 Glass of Lifecore Ionized Water has similar anti-oxidant effect equivalent to:

= 94
Bananas

= 38
Carrots

= 64
Apples

= 30 Glasses of
Green Tea

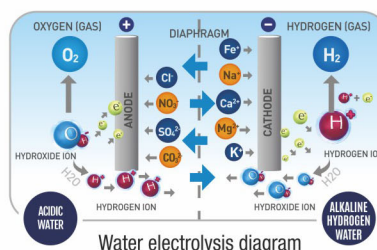

= 1 Kg
Blueberries

ELECTROLYSIS - PLATINISED TITANIUM ELECTRODE PLATES

- Powered by Smart Intelligence Processor
- Platinum titanium plate electrode system

- At cathode : Generating alkaline water
 $2\text{H}_2\text{O} + 2\text{e}^- \rightarrow \text{H}_2(\text{g}) + 2\text{OH}^-$
- At anode : Generating acidic water
 $\text{H}_2\text{O} \rightarrow \frac{1}{2}\text{O}_2(\text{g}) + 2\text{H}^+ + 2\text{e}^-$

What is Micro-Clustering?

Micro-clustering in drinking water refers to the arrangement of water molecules into smaller clusters. The ionization process breaks the inter-cellular bonds of water molecules and reorganizes water to approximately 3-6 molecules per cluster. This smaller cluster size means that water can be more easily absorbed into the cells, and improved hydration, enhanced cellular regeneration, increased energy and vitality and better detoxification for waste removal. Thus, around 90 percent of this micro-clustered water is absorbed by our cells compared to 15 percent of the normal water.

MADE IN SOUTH KOREA

PURIFIED WATER

pH 7

- Reduces the chlorine, chemicals, bacteria, and other contaminants found in tap water.
- Perfect for drinking with medication.
- Ideal for babies' drinking water and mixing with formula.
- At the time of eating food.

BEGINNER WATER

pH 8.5

- A lower pH level and negative Oxidation-Reduction Potential (ORP) helps to facilitate the body's adjustment to drinking alkaline water.
- Good for those just starting to drink alkaline water (about 2-4 weeks) and those with a sensitive stomach.

DAILY ALKALINE WATER

pH 9

- Energises, hydrates, slows down oxidation, and helps the body maintain an optimal pH balance.
- After initial period (2-4 weeks), this water can be used for regular drinking. Improve your overall health.

THERAPEUTIC WATER

pH 9.5

- Therapeutic water that helps to relieve gastrointestinal symptoms, such as hyperacid, indigestion, chronic diarrhoea, and odd fermentation in the intestine.
- Drinking with alcohol prevents hangovers.

STRONG WATER

pH 11.5

- Use a higher pH level to effectively clean fruits and vegetables, helping to remove dirt, waxes, and oil-based pesticides.
- Soak dried beans or grains to accelerate cooking and enhance flavor.

BEAUTY WATER

pH 5

- Maintains healthy skin and balances your skin's pH level. Removes oil without chemical agents.
- Ideal for brushing teeth.
- Relieves the aggravation caused by dry, itchy and chapped skin, and symptoms from eczema.

DISINFECTANT STRONG WATER

pH 2.5

- Hand & Surface Sanitizer – Safe alternative to chemical sanitizers for hands, kitchen slabs, utensils, and bathrooms.
- Reduces the amount of chemicals and cleaning products needed during basic household cleaning.

COMMON DISEASES caused by drinking wrong water

Eczema

Allergies

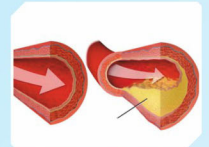

Diabetes

Osteoporosis

High Blood Pressure

High Cholesterol

Chronic Diarrhoea

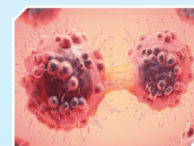

Chronic Fatigue

Obesity

Gastritis

Tumour / Cancer

Toxin Neutralization

Colon Cleansing

Dehydration

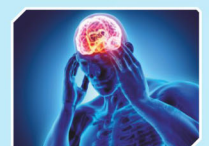

Common Colds

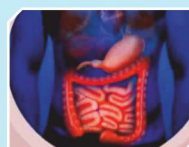

Gout & Arthritis

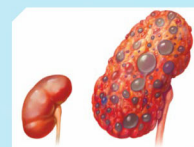

Constipation

Migraines

Ulcer

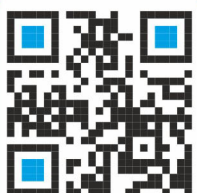

Kidney Diseases

Ageing

* **Disclaimer:** pH measurements may vary according to the water quality (water hardness, salt, particles, etc.) in each location, and the measurement device.
